

The Beta Buzz

**Newsletter Vol. 1 Number 7
Summer 2007
Brookfield, CT**

Summer is upon us. Many of our customers will be shutting down for a week or two for maintenance. Please remember that BSL not only sells Micraligns and parts, but we have the most knowledgeable field engineering staff available. Please call us to schedule your service.

Let us know if there is anything in particular you would like to see in the "Buzz", and we'll try and put it in a future edition.

Here's what is new...

Celebrating our 20th Anniversary in Business (1987-2007)

Beta Squared Lithography, Inc. (BSL) provides custom integrated equipment in the Semiconductor Industry to meet customer needs. "Twenty years ago we started out as a lithography company" says Joe Briganti, President/CEO of Beta Squared Lithography, Inc. "Our success is due to non-stop business and investments we've made in our infrastructure. This has allowed us to continually grow, meeting the strict requirements of our customers in the Semiconductor Industry. We support our large customer base with global field service and local inventory."

A management buyout in 1999 allowed the company to expand into Leading Edge Equipment Modifications, System Integration, and New Software Development. The outcome has led to products such as OS2000 with Load & Go™, Global Alignment, Helium Regulator Assembly Kit (Hose & Go), New SMC Style 900, 800 and 300 manifolds and an array of High Reliability parts and much more.

Curt Timmerman, VP/CFO says, "BSL is committed to providing cost-effective solutions of the highest quality. Our mix of industry expertise, engineering and R&D experience enables us to provide our customers with the largest and most knowledgeable field engineering staff servicing Micraligns today. The depth and breadth of our inventory is second to none. Micraligns are our business."

We at BSL would like to thank all its customers over the last 20 years for giving us the opportunity to serve you.

Beta Squared Lithography's Preventative Maintenance & Emergency Service Support Agreements

Having a BSL Service Support Agreement is an easy and efficient way to maximize your investment and help reduce the total cost of ownership. Whether you have one Micralign™ in your fab or several, we can customize a support plan to meet your requirements. Plans are available at varying levels of support so you get the right support to fit your needs. It's peace of mind after your warranty expires.

Preventative Maintenance: A well-planned maintenance program can save you significant money over the life of your equipment by keeping it operational and extending its life. Consider what a single catastrophic failure, due to improper maintenance, can cost in terms of:

- Increased repair costs
- Loss of production
- Idle personnel and equipment
- Disruption of schedules
- Customer's loss of confidence in you

With so much at risk, today's most savvy customers know that a planned maintenance program more than pays for itself over time. That's why so many customers depend on Beta Squared Lithography's Service Support Agreements. It is the fast, easy way to keep your equipment at peak performance and assure that all scheduled maintenance occurs on time. With a BSL Service Support Agreement, you can customize a planned maintenance program to meet your unique requirements, including:

- Scheduled maintenance performed on time and as specified in your Operation & Maintenance manual
- Maintenance history for your equipment

When your equipment is maintained properly, you can achieve maximum uptime:

- Better plan and control maintenance
- Know costs up front
- Plan your work schedule more effectively
- Utilize your personnel for the jobs they were hired to do
- Take care of your equipment with high reliability BSL parts and BSL trained experts

Call today about getting a Service Support Agreement today!
